

Compound Assignment Operators.

These are use for writing simple and easy to read statements.

If the statement is `sum=sum+x;`

same statement can be written as `sum+=x;`

Compound Assignment works with Arithmetic and Bitwise operators.

examples:

`temp+=x;`

`temp-=x;`

`temp*=x;`

`temp/=x;`

`temp%=x;`

`temp<<=x;`

`temp>>=x;`
